Faith-based decision making and community protection

Career Pathways & Opportunities

Cybersecurity Specialist

Protect organizations and faith-based communities from digital threats while applying ethical frameworks

Technology Manager

Lead IT departments with biblical leadership principles and strategic business acumen

Business Consultant

Advise organizations on technology integration with ethical considerations and faith-based values

Graduates are prepared for diverse roles across business, technology, and faith-based organizations, equipped to make ethical decisions in complex professional environments.

Program Distinctives

Faith Integration

Every course incorporates biblical principles and Christian worldview, ensuring graduates can navigate the intersection of faith and technology with confidence and conviction.

Practical Application

Hands-on capstone projects, internships, and research opportunities provide real-world experience in applying business and technology skills within ethical frameworks.

Flexible Learning

100% online format with accelerated 4-8 week courses allows students to balance education with work and personal commitments while maintaining academic rigor.

Comprehensive Curriculum

120 credit hours covering business management, cybersecurity, cloud computing, and religious ethics prepare graduates for leadership in multiple sectors.

Your Royal Position Awaits

> *"And who knows but that you have come to your royal position for such a time as this?"*
>
> **Esther 4:14**

This program prepares you to lead with integrity, innovate with purpose, and serve with excellence in the business and technology sectors. Equipped with technical expertise and grounded in Christian values, you'll be ready to make a meaningful impact in your chosen field.
